File Operator

Personal Journal Manager - Project Output

Overview

This document shows the console output of the Personal Journal Manager, a Python program built with an object-oriented **JournalManager** class. It stores timestamped entries in **journal.txt**, supports add, view, search and delete operations, and handles file errors gracefully with exception handling.

Session 1: Errors when the file does not exist

```
Welcome to Personal Journal Manager!
Please select an option:

1. Add a New Entry
2. View All Entries
3. Search for an Entry
4. Delete All Entries
5. Exit

User Input:
2

No journal entries found. Start by adding a new entry!

User Input:
3

Enter a keyword or date to search: productive

Error: The journal file does not exist. Please add a new entry first.

User Input:
4
No journal entries to delete.

User Input:
6

Invalid option. Please select a valid option from the menu.

User Input:
5

Thank you for using Personal Journal Manager. Goodbye!
```

Session 2: Add, view, search and delete

```
Welcome to Personal Journal Manager!
Please select an option:

1. Add a New Entry
2. View All Entries
3. Search for an Entry
4. Delete All Entries
5. Exit

User Input:
```

```
1

Enter your journal entry:
Today was a productive day. I learned about file handling in Python.

Entry added successfully!

User Input:
1

Enter your journal entry:
Had a great session on OOP concepts!

Entry added successfully!

User Input:
2

Your Journal Entries:
---------------------------------
[2026-11-02 06:18:51]
Today was a productive day. I learned about file handling in Python.

[2026-11-02 06:18:51]
Had a great session on OOP concepts!

User Input:
3

Enter a keyword or date to search: productive

Matching Entries:
---------------------------------
[2026-11-02 06:18:51]
Today was a productive day. I learned about file handling in Python.

User Input:
3

Enter a keyword or date to search: holiday

No entries were found for the keyword: holiday.

User Input:
4

Are you sure you want to delete all entries? (yes/no): no

Deletion cancelled. Your entries are safe.

User Input:
4

Are you sure you want to delete all entries? (yes/no): yes

All journal entries have been deleted.

User Input:
2
```

```
No journal entries found. Start by adding a new entry!

User Input:
5

Thank you for using Personal Journal Manager. Goodbye!
```

File Handling Modes Demonstration (file_modes_demo.py)

Output showing how modes **x**, **a**, **r** and **w** behave.

```
1. Mode 'x' - exclusive create (fails if file exists)
   File content after 'x': 'Line 1\n'
   Second 'x' open -> FileExistsError (file already exists)

2. Mode 'a' - append (keeps old data, adds at the end)
   File content after 'a': 'Line 1\nLine 2\n'

3. Mode 'r' - read (file must exist)
   Read: 'Line 1\nLine 2\n'
   Opening a missing file with 'r' -> FileNotFoundError

4. Mode 'w' - write (OVERWRITES all existing content)
   File content after 'w': 'Only this line remains\n'
```

Scenarios Covered

• Welcome menu and exit message

• Add a new entry (file created automatically with timestamp)

• View all entries, including the file-not-found case

• Search by keyword: match found and no match

• Delete all entries with yes/no confirmation

• Invalid menu option handling
